Exploration of Homelessness in the United States: A Data-Driven Analysis

Paul Zee-Cheng

Group Section 1. Github User Name PaulZUC.

The following visualiztions and analyses explore the issue of homelessness in the United States, utilizing data from the ASC, PIT Counts, the Urban Institute's Mobility Initiative, and the Census Opportunity Atlasto provide insights into the demographics, trends, and factors contributing to homelessness. The goal is to identify patterns and inform potential policy interventions to address this critical social issue.

Figure 1 shows the trends in living standards over time.

Figure 2 shows the trends in living standards over time.

Figure 3 shows the trends in living standards over time.

Figure 4 shows relationship between homelessness, unemployment, and government assistance for all states over a 10 year period, as visualized in a locally deployed streamlit app.

Figure 1: Cost of Living changes by county, over 10 years.

Figure 2: Adult earnings of children who's parents were in the top 75th percentil of income, versus change in living standards of county of children during development.

Figure 3: Adult earnings of children who's versus change in living standards of county of children during development, separated by income quartile earnings of parents, for 75th, 50th, and 25th quartile.

	State	homelessness_change_10_years	public_assistance_change_10_years	employment_change
0	Alabama	631	-1399	-3
1	Alaska	730	-4869	-1.9
2	Arizona	4841	9089	-2.3
3	Arkansas	223	-4763	-2
4	California	71346	55932	-1.4
5	Colorado	8762	12039	-0.9
6	Connecticut	-637	-14514	-2
7	Delaware	405	1719	-0.7
8	District of Columbia	-1682	7000	-1.7
9	Florida	-4538	27139	-2.4

Figure 4: Sample of locally deployed streamlit app, saved as app.py, tracking relationship between homelessnes, unemployment, and government assistance for all states over a 10 year period.
